Experiment 16 Worksheet: Making Ice Cream

**Purpose:** (A statement should be made here regarding what your experiment is designed to accomplish.)

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

**Procedure:** (Describe here how you went about completing your experiment. Use enough detail that someone could repeat it, if necessary. Also reference any books or manual you may have used to assist you.)

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

**Data:**

Describe the appearance of the ice cream:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

**Questions**

**Why do we add salt to the ice when making ice cream?**

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Ice cream contains both carbohydrates (sugars) and lipids (fats). Could you just eat ice cream as your only food source and remain healthy? Why or why not?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
Conclusions: (Summarize your results here and discuss possible errors that may have occurred during the testing.)
