

HARSH-ENVIRONMENT MASS SPECTROMETRY: FORENSIC SCIENCE IN THE FIELD

Kevin Lothridge, CEO, National Forensic Science Technology Center
7881 114th Ave N, Largo, FL 33773

Harsh-environment mass spectrometry puts traditional tools in non-traditional environments and improves the gap in field-provided analytical information. This presentation will discuss current platform and equipment used for deployable forensic analysis and outline the training used for trace chemistry analysis. Techniques can be used by law enforcement and military for investigative and intelligence gathering purposes.
