

NMR Facility Rate Schedule

(Updated in Feb 2019)

The new NMR instrument cost structure is based on the cost allowing proper maintenance of facility; the followings are the adjustments discussed by NMR committee and approved by university

1. Internal Users

- For all instruments except for B700 occupied less than one day: \$10/hr,
- For B700 with cryoprobe, the rate is \$15/hr.

Considering that longtime experiment can dramatically increase the instrument efficiency, discounts are given:

- Discount rates for long time and multiple days are \$150/day (except for B700) and \$200/day (B700)
- Caps for internal users' long time run experiments on all instruments, maximum costs as follows: \$800/1 week, \$1250/2 weeks, \$1750/1 month
- Rates for internal collaboration or external user's service keep no change.

2. External Users

- \$60/hr on B700
- \$50/hr B600, B500Wb
- \$40/hr B500, B400, I400
- \$30/M300
